

# ACR30D Dual Interface Reader

At Your Choice!!

USB

or

COM Port

## Good for various parties such as:

- System operators and application providers (such as a bank) who distribute readers to end users without knowing which interface a customer wants and finds it costly to ask
- End users who may use the serial interface today and may switch to USB interface as they upgrade the PC
- End users who may use the reader for more than one PC

## Easy installation even for laymen:

- If you plug in the USB interface, the USB interface will be activated.
- If you plug in the serial interface, the serial Plug and Play interface will be activated.
- If you plug in both interfaces, the default interface is serial Plug and Play.

ACS is the first company in the world to have a USB reader with a single-chip solution certified by EMV.  
ACS won the "1999 Hong Kong Awards for Industry in Technological Achievement".
